A Victor Central School District student was hospitalized following a Thursday morning crash involving a school bus.

According to the school district, a bus transporting kindergarten through sixth grade students backed into a garage during the morning bus run, causing a student to fall from a seat.

That student was transported to F. F. Thompson Hospital in Canandaigua by ambulance. The district did not say whether the student’s injuries were serious.

All other students on the bus were evaluated at the scene by a school nurse, a district official said. The students were then moved to a new bus and transported to school for further evaluation by a nurse.

Parents of students on the affected bus were notified, the district said.

The circumstances of the crash are under investigation.

“The Victor School District is working closely with authorities as they investigate today’s accident,” district officials said in a press release. “As always, the safety and well-being of our students is our highest priority.”
